

Meeting #1 Notes

Sept. 20th, Tuesday 2:00pm

Clients: Mark Dixon, Lorne Johnson, and Anne Brunton (Anne busy on Wednesdays)

Mark has done a number of capstones in comp sci. & business that were successful.

Been selling firewood jointly with camp OAC for a couple of years

Started firewood project beginning of covid (2020)? Sold \$35,000 of wood

Finds the selling of wood has been tedious and would like to automate the system so that there is less manual work needed to be done

The website is for promoting & selling firewood. Most sales have been done through Facebook marketplace and we will continue to promote on Facebook.

Wood is stored in multiple locations around West Kelowna / maybe Kelowna?

Wants website to handle communication between firewood sellers & customers

Wants to streamline the process so we can increase sellers & options for selling & promotion

Want to keep a database of customers so that we can inform them when firewood is for sale & when it is not for sale (during fire bans)

Develop a website for ordering & purchasing of firewood

TODO: Figure out a scheduled meeting time with the other groups for weekly client meetings.

Need a web server to host the website

Need to use SQUARE for credit card processing.
