

OAC Group C Scrum Meeting Minutes
Wednesday March 20th, 2023

Present:

Zach Prenovost
Karlen Speiser
Cam Wilson
Aidan Murphy

Meeting Purpose Summary:

Convene with other OAC groups and client, confirm current features, and ask about small adjustments. Quick demo to clients

WHAT TO DO

What have we added:

Backend filtering order history
Order search by phone numbers
Twilio phone and email confirmation set-up
Styling (front end works for mobile)
Functionality particularly for super admin (delete)

By tomorrow

- **Backend table css format - cleanup (zach)**
- **Picture on order page (cam)**
- **Move reset password onto new page (aidan)**

Ask

- **Phone number search on search for orders**
 - Ans: It's fine, black out some info that identifies the person (email)-
- **Do we want admin access by address or general location?**
- **How do we separate admin super admin in general?**
 - We should pick; do it in a way that's smart
- **Do they want an instructional or information page on the admin side to explain all the tools?**
 - Yes
- **How long should we expire orders?**
 - Don't expire orders

By end of project

- Phone number standardization
- Order form error checking
- Staff should be able to edit info on staff accounts
- Change display to what page we are on (admin)
- Change stock on order
- Export to csv
- If regular admin > check location on update loc > if != display err contact superadmin to change stock, if == change stock
- If reg admin only view live orders

Zoom Notes

Demo of our website:

TODO: Send screenshots to Anne and Lorne of our confirmation pages...etc.

- To get appropriate verbiage

TODO: Instruction page on how to use admin tools is needed. There will be new staff members throughout the year so this will be good information for them.

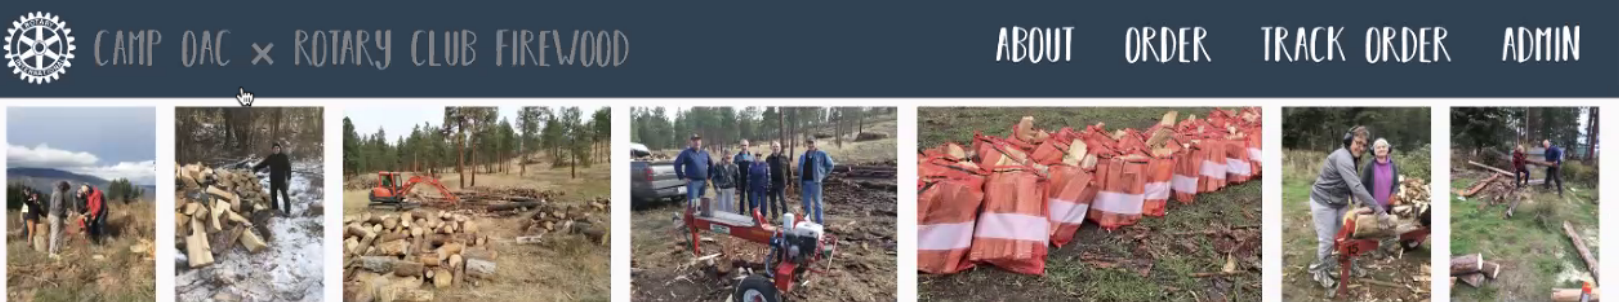

View Orders page:

- Phone number seems it is a good option to use, order number isn't needed
- Remove email: Client is not concerned about privacy of information

TODO: Send a copy of peer testing report to Lorne

Boulangier group demo:

- Extract order information as CSV file
- Using Twilio to send alerts for low stock, receipts...etc.
- Some verbiage that was sent from Anne:

Ryder group demo:

- Integrated maps API using dummy addresses
- Many admin filters on order history (ex: search by admin who approved)
- Super admin features
 - Ability to update homepage description from admin portal
 - Same with twillio messages
- Statistics page which shows graphs based on order data

Next up:

Final presentation (April 12th 11:00am-11:45am)

- Mark will try to be there

No need for in person demo before final presentation

No need for another zoom meeting

Reach out by email if we need any information or have questions
