

OAC Group C Scrum Meeting Minutes

Monday October 3rd, 2022

Present:

Zach Prenovost

Karlen Speiser

Cam Wilson

Aiden Murphy

What was discussed

Question: Do we actually need a database?

Answer: Yes.

Web hosting - 15\$ a month

Bluehost:\$4.08CA/month (12 month plan only)

Hostinger:\$9.99USD/month or \$2.99USD/month (12 month plan)

A2 Hosting: \$10.99USD/month or \$6.99USD/month (12 month plan)

We will need to figure out the tech stack.

You have mentioned there should be a database, this database will require database hosting.

This would incur a cost separate to the cost of web hosting, how much would we want to budget for that?

What's the expectation for testing costs?

Plan:

Continue to work on Requirements report (ALL)

-Finish tech stack inclu. Back-end languages, frameworks, web servers, database options. (Karlen) Should be finished by Oct 5%.

Database stuff:

Look into different databases / determine stack (Zach / Karlen)

Figure out our milestones: 1st milestone: Requirements report

2nd milestone peer testing 1: Front end development?

3rd milestone peer testing 2: Back end?

4th milestone: final product (Aiden / Cam).

ER diagram: (we need one of these, this is an example)
